

Letter of Interest to the South Dakota Science and Technology Authority (SDSTA) for the Homestake Deep Underground Science and Engineering Laboratory (DUSEL)

December 9, 2005

To Homestake DUSEL team:

I would like to be considered for the Education and Outreach Collaboration for interdisciplinary training at DUSEL. Education and outreach programs I would be interested in include research experiences for teachers (RET) and undergraduates (REU), teacher workshops (in-service training, local and national Science Teacher Association sessions, 2-7 day workshops), product development and testing (whether it be formal, informal or outreach), and the evaluation and assessment of the education or outreach programs.

I would bring to DUSEL experience in the above areas of education and outreach and partnership and collaborative efforts with the Indiana Princeton Tennessee Astrobiology Initiative.

Sincerely,

Susan M. Pfiffner, Ph.D.
Research Assistant Professor
Department of Microbiology
The University of Tennessee
Center for Biomarker Analysis
